# **INFINITY**2-5

5.0 Megapixel CCD USB 2.0 Camera

High resolution CCD color or monochrome microscopy camera for qualitative image archiving

# **INFINITY**2-5

Lumenera's INFINITY 2-5 digital CCD USB 2.0 camera offers excellent sensitivity, high resolution and a global electronic shutter. This is an ideal camera for brightfield, darkfield, and DIC imaging applications where higher resolution archiving and a wide dynamic range are routinely required. With 2448 X 2048 resolution and onboard processing, the INFINITY2-5 delivers outstanding image guality for a wide variety of scientific applications.

# **Superior Sensitivity and Color Reproduction**

Years of experience in the microscopy market have allowed Lumenera to develop specialized color algorithms ensuring excellent color reproduction. Additionally, INFINITY software allows the adjustment of all live preview color facets, enabling users to apply their own personal preferences to each image. For lower light applications the Sony CCD sensor has a high dynamic range, resulting in excellent camera sensitivity.

# Full Image Analysis Software Included

INFINITY CAPTURE, an intuitive image capture program, and INFINITY ANALYZE, a full image analysis package offering; camera control, measurement, annotations, tiling and post capture enhancement, are both included. Camera and software combined to create a complete microscopy imaging solution for your application.

# **USB 2.0 Plug-and-Play Interface**

Once the software had been installed, running one or more cameras on a single computer is as simple as plugging them into a high-speed USB 2.0 port.

# **Third-Party Software Integration**

INFINITY cameras are integrated into a variety of third-party software packages through direct drivers or with TWAIN/DirectX support.

# Mac Camera Software

A Mac camera driver and ImageJ plug-in are available for the INFINITY2-5. Please refer to the Lumenera webpage www.lumenera.com for up-to-date details.

# Superior Technical Assistance Center (TAC)

As a Lumenera customer you gain access to the TAC group and knowledge base, which provide full support for cameras, software and microscopy applications.
